
(a)
best of 4, $|R| \approx 0.33$
best of 4, $|R| \leq 0.13$
straight start (one run)
range over starts
lamina s_{20} (right)
band-averaged redirection $\langle G_\varphi \rangle$
channeling share s_{20} (%)
lamina anisotropy E_{f1}/E_{f2}
(b)
lens
range over 8 starts
best found (lower bound)
best, no limit
$0.7\lambda_\parallel$
redirection $\langle G_\varphi \rangle$
min. tow radius $R/\lambda_\parallel$
(c)
cloak
curvature-limited
no limit
far-field reduction at $\omega = 50$
min. tow radius $R/\lambda_\parallel$
